

# WORK EXPERIENCE

## Onix-Systems

Fullstack Developer | Oct 2024 – Present

- Developed a full-featured order and receipt tracking service with both client and admin panels for order management.
- Implemented company and seller management, registration via unique links, and Google Sheets data export.
- Built a secure backend with Express, JWT, and file handling using Multer.

**Stack:** Next.js, Nest.js, Express, PostgreSQL, Google API, JWT, Multer

## Panda Web Studio

Fullstack Developer | May 2023 – Jul 2024

- Designed and built e-commerce platforms and one-page websites with shopping carts, sorting, filtering, and subscription systems.
- Developed an admin panel enabling product management, user tracking, and statistics visualization.
- Deployed production-ready apps to VPS using Nginx and PM2.

**Stack:** React, Express, MongoDB, Redux Toolkit, TailwindCSS, Nginx, PM2

## Freelance Projects

Fullstack Developer | 2021 – 2023

- Created multiple one-page commercial websites and custom admin dashboards.
- Developed a Telegram-based web app store for PlayStation games and in-game purchases, with advanced filtering and payment logic.
- Built a real-time Telegram clone using Socket.io, replicating chat, profile, and message functionalities.

**Stack:** React, Node.js, Express, MongoDB, Socket.io, TailwindCSS

## Pet Projects

Fullstack Developer | 2020 – 2022

- Built a to-do platform with public/private notes and a rich text editor.
- Developed a quiz website allowing users to create and share their own tests and articles.
- Created a dynamic news portal with an admin panel and article import from external sites.

**Stack:** React, Node.js, Express, MongoDB, TailwindCSS
