## PROFILE

Front-End Developer with 4 years of experience in creating modern web applications. Skilled in writing clean, efficient, and reusable code, with a strong focus on user experience and performance. Passionate about developing innovative solutions and eager to contribute to dynamic teams and meaningful projects. Motivated to tackle complex challenges and continuously learn new technologies to deliver high-quality software.

## WORK EXPERIENCE

### FRONT-END DEVELOPER

#### Panda Web Studio

May 2023 - July 2024

- Created numerous one-page websites.
- Website for purchasing subscriptions with an admin panel. The website had a shopping cart, sorting, and filtering. Detailed page logic with its own price for each product variation. Admin panel with the ability to change and create products, display all users and statistics. Backend on Express JS + Mongo DB.
- I have installed numerous projects on a VPS server using nginx and pm2.

### FULLSTACK DEVELOPER

#### Onix-Systems.

October 2024 - current

- Created a service for tracking orders and receipts with a customer section and an admin panel with functionality for managers who process orders. The website allows users to create companies and sellers and use them to create orders. Registration was implemented via a link. Export to Google Sheets is also available.
- Online fireworks store with a shopping cart and catalogue filtering. It also features an admin panel where you can create products, categories, and news items. Express, Multer, and JWT were used on the backend.

- Telegram web app store for PlayStation games, subscriptions, and donations. The website features a news slider, search, filtering by category and price, game selection logic, shopping cart, and profile settings with platform selection and top-up options. An admin panel is also available where all of this can be edited.

#### FULLSTACK DEVELOPER

##### **Freelance.**

- One-page website for selling clay products
- A one-page website with an admin panel for purchasing in-game items in a fishing game. The admin panel features drag-and-drop functionality for rearranging the order of items.
- A clone of Telegram using socket.io with almost identical functionality to the original.
- One-page website for selling branded clothing. Many other one-page websites.

##### **Pet-Projects.**

- A to-do list where you can make your notes private or public. It also has a handy text editor.
- A quiz website where you can create your own test and other people can take it. You can also create articles there.
- Website gallery with registration via Telegram bot.
- Pizzeria website with admin panel.
- A news website with the ability to add news items and edit them conveniently via the admin panel. There is also a function for importing articles from other websites.
