EDUCATION

Karazin Kharkiv National University	Sep. 2024 - May 2029

Bachelor of Arts in Computer Science

PROFESSIONAL EXPERIENCE

GlobalLogic October 2023 - August 2025
MiddleFullstack Developer

- Developed microservices using Express and TypeScript.
- Worked with ODBC DB2 and Oracle databases, optimizing SQL queries by 40%.
- Implemented GitLab CI/CD pipelines and built Docker images for applications.
- Developed a React application with full localization support
- Wrote unit tests for both microservices and frontend applications.
- Created Kubernetes YAML manifests to deploy and manage microservices.

Reelo Inc. March 2023 - Sep. 2023
Middle Frontend Developer

- Implemented a subscription system for organizations with plan-based limitations using Stripe.
- Developed video editing functionality for AI-generated property videos, allowing users to modify text, change music, and add custom elements.
- Integrated an API for importing real estate listings from REA Listing for seamless property uploads.

TONChemy Sep. 2022 - March 2023
Strong Junior Fullstack Developer

- Designed and implemented a PVP system using WebSockets for real-time interactions, matchmaking, and battle mechanics.
- Developed battle card gameplay logic, including dynamic resource generators and stat-based mechanics.
- Integrated i18n localization, TON blockchain interactions (SDK), and Redis caching for performance optimization.
- Automated API documentation with Swagger and OpenAPI Codegen, improving request handling and scalability.

Onix-Systems, Kharkiv January 2022 - September 2022
Junior Fullstack Developer

- Developed a subscription service for streaming platforms with dynamic pricing, tailored database structures, and webhook-based payment integration.
- Designed landing pages for various industries, including studios and trading companies.
